

Join Nepa's fast growing Automation and Efficiency Team

Nepa is looking for an innovative Senior Technical Analyst who will play a crucial role to take our Automation and Efficiency to the next level. You will join our office in Mumbai and report to the Team Manager.

Your role as our Senior Technical Analyst

As a Senior Technical Analyst at Nepa you will work as an Analyst and Programmer. You will be dealing with some of our most technically challenging projects, where it is not possible to make the delivery using only the standard setup of BI-tools. We believe that actionable insights are created in the intersections of different data sources and systems. You will be combining many different technical skills and analytical methods as part of larger deliverables to create products to make your colleagues' work easier.

Your profile as our Senior Technical Analyst

You are a flexible, resourceful and open minded person with a highly analytical mind and a constant drive to learn more. You are passionate about inventing new products and solving business issues. You use your analytical and programming skills to build the bridge from a great theoretical idea to an intuitive product and converting multisource data into actionable insights. It is important that you have ability to pick and mix a wide variety of tools from your toolbox. You have experience from a wide variety of tools for analysis as well as programming and scripting languages. Examples of useful skills:

- Programming Skills (C#, R, Python, VBA)
- Database (SQL, NOSQL)
- Business insight (as well the use of BI-tools like SSRS, Tableau etc.)

A few more thing

- You have at least 2-3 years of relevant working experience.
- Proven statistical knowledge
- You share our core values (Passion, Innovation and Collaboration).
- You take pride in delivering high level of services. We are known for that.

Nepa help companies to accelerate their business performance by becoming customer centric at their fingertips. We help you bridge the gap between insight and action to facilitate a customer centric decision making. By merging behavioural data with customer feedback data, our clients turn the voice and the footprints of the consumer into financial KPI:s and provide it to the right stakeholder in real-time.

Headquartered in Stockholm, Sweden with local presence in Denmark, Finland, UK, US, India, Norway, Singapore (rep), and China (rep).
